UAT Report Template

Prosperity Prognosticator: ML For Startup Success Prediction

User Acceptance Testing (UAT) Report

1. UAT Overview

Field	Details
Project Name	**Prosperity Prognosticator**
Testing Phase	**User Acceptance Testing (UAT)**
Test Date	**_____**
Tested By	**_____**
Application URL	**http://127.0.0.1:5000**

2. Test Cases

TC ID	Test Case	Steps	Expected Result	Actual Result	Status
TC-01	Index page loads	Open browser, go to localhost:5000	Index page displayed		
TC-02	Submit valid form	Enter all metrics, click Predict	Result page with prediction		
TC-03	Success prediction	Enter high-quality startup metrics	Shows Success result		
TC-04	Predict again	Click Predict Again on result page	Form loads again		
TC-05	Failure prediction	Enter low-quality startup metrics	Shows Failure result		
TC-06	Predict again	Click Predict Again on result page	Form loads again		
TC-07	Empty form submit	Leave fields blank and submit	Validation error shown		
TC-08	Flask server runs	Run python app.py in terminal	Server starts on port 5000		
TC-09	Model loads correctly	Check server logs on startup	No model loading errors		

3. Test Summary

Metric	Count
Total Test Cases	10
Tests Passed	
Tests Failed	
Tests Pending	
Overall Result	PASS / FAIL

4. Defects Found

Defect ID	Description	Severity	Status

5. UAT Sign-Off

Field	Details
Tested By	
Date	
Result	PASS / FAIL
Comments
